Work Experience

Software Engineer

2023–Today

Future Healthcare Group

Working in a small but proactive team managing platform architecture and clients technical integration's. Main functions:

- Design integration API's and producing documentation for new clients.
- Developing internal services to support any existing or new integration.
- Evaluate existing IT infrastructures, identify pain points, and providing solutions to streamline processes and enhance performance.

Software Engineer

2021–2022

Infinera

I've had the privilege of working as a developer in Software-Defined Networking (SDN) for fiber optics. Collaborating with talented teams, I helped to craft software solutions aimed at optimizing data flow over fiber optic networks.

Software Engineer

2020–2021

Vodafone Portugal

I contributed to a project managing internet subscriptions for cars, maintaining a platform for efficient connectivity and subscription management.

Software Engineer

2020

AXA Belgium

I helped in the development of a platform for checking accident-related claims. This platform enabled users to upload necessary documentation and efficiently manage their claims process.

Software Engineer

2019–2020

Rethink Germany

Migration of a monolithic app to AWS cloud. Some of my functions included:

- Migrating pure Java and Java Server Pages to Java Server Faces.
- Migrating persistence layer from old architecture to use Java Persistence API.

Full Stack Developer

2018-2019

Caixabank Spain

Developed new features in a closed system architecture (full stack)

Full Stack Developer

2017-2018

APA Portugal

Implemented new features for the company licensing portal and refactored existing architecture to match client needs

Junior Developer

2014-2016

IGFEJ Portugal

Performed corrective maintenance on diverse in-house web applications and implemented security fixes raised by external audits

Education

Bachelor's Degree in CS

2012-2016

ISEL Portugal
